I have completed my Bachelor's degree in Information Technology and have developed a strong interest in frontend and mobile app development. I enjoy creating user-friendly applications and exploring new tools in tech and cybersecurity. I'm eager to grow my skills further and build a successful career in the IT field.

## EXPERIENCE

### Freelance Frontend & Mobile App Developer

- Developed simple websites and mobile applications using HTML, CSS, JavaScript,.
- Created Android apps using Android Studio, focusing on UI design, navigation, and functionality.
- Worked on small real-world projects to improve performance, design, and user experience.
- Gained hands-on experience in frontend technologies and mobile app development.

### Assistant Application Developer

Gaidakot-1, Nawalpur East

Maulakalika Networks Pvt Ltd

May, 2025

Assisted in designing, developing, and testing mobile and web applications, while contributing to project documentation. Supported senior developers by implementing new features, fixing issues, and helping improve overall system performance and user experience.

### Assistant Application Developer

Gaidakot-1, Nawalpur East

Maulakalika Networks Pvt Ltd

Feb, 2025 - Apr, 2025

### Front-End Developer and Mobile Application Development

Bharatpur-10, Chitwan

Tivra Institute of IT Training Center

Sep, 2024 - Dec, 2024

Supported the development of front-end web and mobile applications by building responsive user interfaces, testing components, and assisting in feature implementation. Collaborated with senior developers to improve performance, fix bugs, and prepare project documentation.

Vijaya Samudayik Shiksha Sadan

## PROJECTS

### Personal Portfolio Website Frontend Website | HTML & CSS

- Designed and built a personal website showcasing skills and contact information.
- Focused on responsive design and clean UI.

### SuitCase Application Android App | Android Studio

- Created a basic suitcase/travel management app to help users organize travel items.

- Implemented navigation and basic UI components using Android Studio.

### **MealMate Android App | Android Studio**

- Built a user-friendly food management app to track and explore meal options.
- Focused on layout design, intent navigation, and feature structure.

### **Login & Signup System Cybersecurity Concept**

- Developed a login/signup interface with input validation and simple security logic.
- Introduced users to basic security features like password rules and form protection.

### **Assignment helper**

- Developed a full-stack web application that allows students to upload assignments, track progress, and receive updates, with a secure admin panel for managing users and assignment statuses.
- Implemented authentication, file upload handling, and email notifications (using PHPMailer), ensuring a user-friendly and efficient academic support system.
